TITLE : IN-OFFICE INFORMATION COLLECTING DEVICE

ABSTRACT : PURPOSE: To provide an in-office information collecting device which always collects the information on office environments and the information on movements of human beings, objects, etc., and can apply these collected information at any time.

CONSTITUTION: An in-office information collecting device collects and arranges various in-office information acquired by the environment information detecting means 1 and 2 by an information collector 4 and then turns these information into a data base 12 in order to realize an optimum office space. The data base 12 serves as the important data for management of facilities and also as the important data that can be used for change of a layout. Meanwhile the change information are automatically generated for control of facilities 19 and 20 when the layout is changed based on those collected information. Thus the layout can be easily changed.
